# Aortic Root Repair - How to Start

11.09.2014

**H.-J. Schäfers**

Dept. of Thoracic and Cardiovascular Surgery  
Saarland University Medical Center, Homburg/ Saar  
Germany

---

# When to repair

Titel des Vortrags und Verfasser (bitte im Folienmaster anpassen)

reasonable

Root dilatation with tricuspid/bicuspid valve, prolapse of 1 or 2 cusps

Root dilatation with prolapse of all cusps, 1 to 2 fenestrations, unicuspid av

Root dilatation with retraction/calcium cusps

?

!

uncertain

## Patient Selection:

Bicuspid or tricuspid aortic valve

Sinus diameter  $> 40$  (45) mm

AV diameter  $< 28$  mm (?)

Bicuspid av: orientation of  
commissures  $> 150^\circ$

Minimal or absent calcification

## Root assessment:

TEE (short and long axis):

AV diameter (?)

ST diameter

sinus diameter

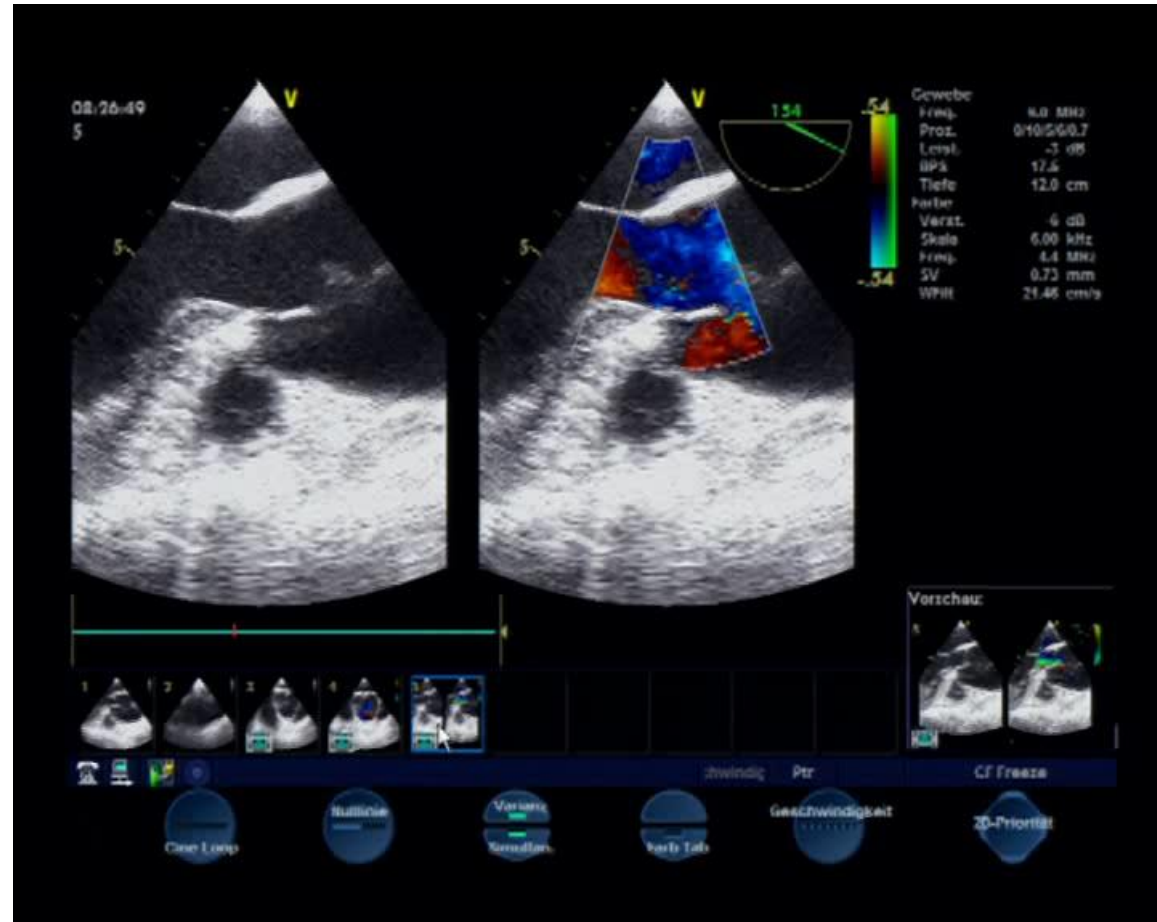

Severity of AR, jet direction?

intraoperative:

AV diameter

Titel des Vortrags und Verfasser (bitte im Folienmaster anpassen)

## Root assessment:

Titel des Vortrags und Verfasser (bitte im Folienmaster anpassen)

# Operative Steps:

## Exposure:

Standard cannulation

Longitudinal incision & cardioplegia

Transsection of aorta (5 – 10 mm  
above commissures)

Stay sutures above commissures

Titel des Vortrags und Verfasser (bitte im Folienmaster anpassen)

# Operative Steps:

## Exposure:

Titel des Vortrags und Verfasser (bitte im Folienmaster anpassen)

# Operative Steps:

## Assessment of the valve:

Titel des Vortrags und Verfasser (bitte im Folienmaster anpassen)

# Operative Steps:

## Mobilization of the Root:

Titel des Vortrags und Verfasser (bitte im Folienmaster anpassen)

# Operative Steps:

## Excision of the sinuses:

Titel des Vortrags und Verfasser (bitte im Folienmaster anpassen)

# Operative Steps:

## Tailoring of the graft:

Root remodeling: respect root symmetry ( $\pm 10-20\%$ )

Incisions for commissures 20%

less than anticipated

(Reimplantation: triangular excision for  
L/R commissure)

Titel des Vortrags und Verfasser (bitte im Folienmaster anpassen)  
**Operative Steps:**

Tailoring of the graft:

Titel des Vortrags und Verfasser (bitte im Folienmaster anpassen)

# Operative Steps:

## Suture Graft to Root:

Titel des Vortrags und Verfasser (bitte im Folienmaster anpassen)

# Operative Steps:

## Assess cusp configuration:

Effective height?

Position of free margins relative to  
each other?

Titel des Vortrags und Verfasser (bitte im Folienmaster anpassen)

# Operative Steps:

## Assess cusp configuration:

Titel des Vortrags und Verfasser (bitte im Folienmaster anpassen)

# Operative Steps:

## Correct cusp configuration:

Central plication of free margin  
extension into cusp??

- Adequate effective height
- All margins at identical level

Titel des Vortrags und Verfasser (bitte im Folienmaster anpassen)

# Operative Steps:

## Correct cusp configuration:

## Operative Steps:

### Reassessment of cusp configuration: (tension on commissural stay sutures)

- effective height ( $> 8/9$  mm)
- free margins at identical height?

Titel des Vortrags und Verfasser (bitte im Folienmaster anpassen)

# Operative Steps:

## Annular reduction

Titel des Vortrags und Verfasser (bitte im Folienmaster anpassen)

# Operative Steps:

## Coronary anastomosis etc.:

# Operative Steps:

## 11. Final check:

TEE:

- AI?

(central, eccentric, degree)

- Configuration of AV

(effective height)

Titel des Vortrags und Verfasser (bitte im Folienmaster anpassen)

# Operative Steps:

## Final check:

# The way to start

## Wetlab:

- transect aorta above commissures
- cut graft (symmetry! Length of incisions!!)
- suture graft to root
- stay sutures to commissures and assess cusps
- observe interaction of pull on commissural  
sutures on effective height
- plicate free margin, assess by eH
- add annular suture
