VITAMIN D

IN PREVENTION AND THERAPY &

BIOLOGIC EFFECTS OF LIGHT

Wissenschaft *ft* Gesundheit

WELCOME

Dear Participants, Colleagues and Friends,

on behalf of the scientific committee, it is a pleasure for us to welcome you at our Joint International Symposium entitled *Vitamin D in Prevention and Therapy and Biologic Effects of Light*.

In recent years, enormous scientific progress has been made on these closely related topics. Our knowledge about the effects of vitamin D and optical radiation on human health has exploded and the underlying mechanisms are beginning to be unravelled. Results from laboratory and clinical investigations have lead to promising new concepts for the prevention and treatment of cancer and many other diseases. This meeting is specially designed to synergistically offer scientists and clinicians insights into the latest developments in these intriguing research areas.

Plenary and keynote lectures, as well as round table discussions and poster presentations, will give an update on carefully selected “hot topics”, including vitamin D, skin cancer prevention, UVA radiation and cellular homeostasis, photocarcinogenesis, and circadian clock. You are cordially invited to join this meeting.

Thank you for coming to Homburg,
we wish us a stimulating meeting!
