Medical Center

CME education points have been requested for this course from the Medical Association of Saarland

Dear colleagues

Endoscopic applications in neurosurgery are rapidly evolving. A wide range of neurosurgical diseases can be treated endoscopically although opportunities and potential pitfalls of these strategies are still under evaluation. This clinical workshop is designed to present a wide range of endoscopic techniques, including intraventricular endoscopy, transsphenoidal and transcranial skull base surgery, peripheral nerve surgery as well as various approaches in spine surgery. Lectures will be given about indications, surgical techniques and equipment selection. Live endoscopic surgeries in HD quality will demonstrate endoscopic approaches to the lumbar spine, endoscopic transsphenoidal and transcranial skull base procedures and intraventricular techniques step-by-step.

We are looking forward to welcoming you in Homburg-Saar.

Sincerely yours

Prof. Dr. Joachim Oertel
